

FOUR ACTION OIL

Data sheet (rev.01/2016)

PIK KEMICAL

Description

FOUR ACTION is an exceptional lubricant, it contains high quality mineral oils, penetrating, anti-corrosive and water-repellent additives, which soften and remove dirt and corrosion.

It keeps the machines at maximum efficiency even with high loads, high pressures and extreme temperatures.

To be applied on: bearings, rollers, shafts, gears, locks, winches, conveyors, conveyor belts, ropes, chains, bolts, axles, spools and hinges. Excellent anti-rust and protective lubricant for tire molds, FOUR ACTION can keep all materials lubricated and protected for long periods.

Benefits

- Penetrates quickly
- Removes moisture
- Anticorrosive and anti rust properties
- Reduces the deposition of dust and abrasive particles
- Dissolves rusty parts
- Release blocked mechanisms
- Does not affect wood, metal, plastic and rubber
- It doesn't stain

Physical and chemical properties

Viscosity:	not available
Base material:	mixture of oils
Specific gravity:	0,92 @20°C (68°F)
Flash point:	>250° C
Utilization range:	from -53°C to + 475°C
Color:	brown
Odor :	light

Packaging

Tank of 10 and 25 LT
Drum of 200 LT
