DESCRIPTION

BIOCLEANER is a biological formula designed for cleaning organic substances and eliminating foul odors caused by decomposition.

The bacteria contained in this product metabolize organic substances.

APPLICATIONS

BIOCLEANER is recommended for usage on:

- Ships galleys and all dining areas - Yachts
- Schools - Hospitals- Restaurants and cafeterias
- Public cleaning - Fish markets
- Industrial laundries - Agricultural farms
- Public swimming pools and sports centers
- Airports - Camping grounds, tourist installations
- Food processing industry - Canning industry
- Slaughter houses

ADVANTAGES

Besides acting as a cleaner BIOCLEANER also has deodorizing properties. It digests organic substances and transforms them into Carbon Dioxide (CO₂) and water, which eliminates foul odours at their very source.

BIOCLEANER liquefies organic residues in drainpipes and sanitary installations such as sewage treatment tanks, thus exerting a preventive maintenance action to avoid clogging of drains.

Using BIOCLEANER regularly ensures clean and odorless sanitation systems. BIOCLEANER is neither toxic, nor aggressive and does not have any counter-indication.

It can operate in aerobic as well as anaerobic mode (with or without the presence of oxygen).

Elimination of waste through digestion of organic substances:

once applied, the enzymes contained in BIOCLEANER use as nutrient organic waste such as grease, oils, proteins, hydrocarbons, sugars, etc. contained in food.

INSTRUCTIONS

- Cleaning: apply the product on the surface to be cleaned with brush, sponge or mop. Wash the residues down the drain.
- Elimination of foul odors: Spray product on the surface to be treated.
- Removing stains caused by organic products: If possible, remove with paper or rag excess material, and spray or pour BIOCLEANER on the stain. Let product act for as long as possible, then dry with a clean cloth or paper. For resistant stains cover the stained area with BIOCLEANER using a damp cloth and let the product act 5 - 6 hours.

PRECAUTIONS

Store in cool and dry place at temperatures between 10 and 30 °C.

Close containers properly after use.

Do not use together with acids, alkali, chlorine or disinfectants.

Wash hands after manipulating the product (as a simple precaution).

Shake well before using as the product has a natural tendency to sedimentation.

Dilute the product only just before using it as water activates the biological process; after 48 hours the product will lose its effectiveness.

Do not spray towards the face. Do not inhale fumes of the vaporized product.

Keep away from children.

PACKAGING

- Carton 12 pieces of 1 liter each
